Charger Deluxe Console EQ2 Mounting Plate Instructions

Application:
 2006-2007 & 2008-2019 Dodge Charger & Magnum Police Vehicles for mounting on EQ2 Equipment Mounting Plate.
 (For Mounting plate to vehicle, see instruction sheet included with the EQ2 Mounting Plate.)
Features & Benefits:

- Full Size Armrest for maximum driver/passenger comfort
- No Drilling EZ Mounting, this kit does not require drilling any holes into the vehicle

Simple Tools Required: #2 Phillips Screwdriver

Kit Includes:

P/N	Description	Quantity
CHG-DLX	Charger Deluxe Console	1
CHG-HW	Hardware Kit including:	
	Black Right Angle Bracket	2
	Button Head Screws	4
	Locking Hex Nut	4
	Black Phillips Needle Point Trim Screw	4

Installation:

1. Install front and rear right angle mounting brackets using supplied small black screws and nuts to factory equipment mounting plate.

1. Next, slide the brackets into the slots and position them at opposite ends of the equipment mounting plate.

2. Place the Console Unit in between the brackets and position it where you want it to be mounted.

3. Slide the right angle brackets snug up to the console body.

4. Carefully remove the console from the brackets without disturbing the position of the right angle brackets.

5. Snug the right angle bracket Phillips head button screws to the equipment mounting plate firmly.

6. Place the Console Body in between the forward and rear right angle plates. Position the Console in the center between your seats and eye it up into the center. The seats will generally do this for you.

7. Install the black Phillips trim screws, two forward and two at the rear mounting the Console to the right angle brackets through the two provided holes.

8. Installation is Complete.

9. Care & Maintenance
 You will find that a damp soft cloth will clean light soiling from your vinyl and cup holders. Eventually a suitable automotive interior cleaner can be used as needed. If your console has a slight squeak of vinyl against vinyl as you position your seat for different drivers or passengers, a light film of silicone spray will usually resolve the squeak.
